AidFlow – Requirements Document

Introduction

AidFlow is a donation management system that enables organizations to handle donation campaigns and link donors with people who require assistance. The system offers an organized browsing of campaigns, offers donations and tracks whether a user has donated to any campaign.

The primary purpose of AidFlow is to simplify the donation process, increase its transparency and efficiency, decrease confusion and better coordinate donors and organisations.

Functional Requirements

FR1 – User Registration and Login

The system shall allow users to create accounts, log in securely, and access features based on their roles.

FR2 – Home Dashboard

The system shall display active campaigns, donation information, and recent activities through a simple dashboard.

FR3 – Campaign Management

Campaign coordinators shall be able to create, update, and manage donation campaigns, including campaign descriptions, requested items, and progress.

FR4 – Donation Submission

Donors shall be able to select a campaign and submit donation offers by providing item details and quantities.

FR5 – Donation Approval

Campaign coordinators shall be able to review donation offers and accept or reject them based on campaign needs.

FR6 – Donation Tracking

The system shall allow donors to track their donation status, such as pending, accepted, received, or delivered.

FR7 – Inventory Management

Storage staff shall be able to record received items, update available quantities, and monitor inventory.

FR8 – Delivery Management

Volunteers shall be able to view assigned collection and delivery tasks and update their completion status.

FR9 – User Profile Management

Users shall be able to view and update their personal information through their profile page.

FR10 – Administration

Administrators shall be able to manage user accounts, assign roles, and monitor platform activities.

NON- Functional Requirements

NFR1 – Usability

The system shall provide a simple, clear, and user-friendly interface that allows users to navigate easily.

NFR2 – Security

The system shall protect user information through secure authentication and role-based access control.

NFR3 – Performance

The system should load pages quickly and respond smoothly to user actions.

NFR4 – Reliability

The system shall store donation records accurately and maintain consistent information throughout the donation process.

NFR5 – Compatibility

The platform should support desktop and mobile devices with a responsive interface.

NFR6 – Maintainability

The system should be designed so that future features and improvements can be added without major changes.

User Interface Requirements

The AidFlow interface shall include the following main screens:

1. **Login / Sign Up:** Allows users to access or create accounts.
2. **Home Dashboard:** Displays campaigns and donation activities.
3. **Campaigns:** Allows users to browse available donation campaigns.
4. **Campaign Details:** Shows campaign descriptions, requested items, and progress.
5. **Make a Donation:** Allows donors to submit donation offers.
6. **My Donations:** Displays donation history and tracking information.
7. **User Profile:** Allows users to manage account details.

The interface should use consistent colors, buttons, navigation, and layouts to provide a smooth user experience.

System Constraints

- Users must log in to submit and manage donations.
- Only authorized users can approve donations or manage campaigns.
- Donation quantities must be valid and greater than zero.
- The system must keep donation records organized to prevent duplicate allocation.
- Donation statuses must be updated when items are received, allocated, or delivered.
